

Neuroscience Working Table

Working Together to Achieve a Neuroscience Center of Excellence

January 12, 2022

“The Neuroscience Working Table (“Working Table”), which includes organizations and coalitions representing more than 100 million Americans with psychiatric and neurologic diseases, commends Senator Collins (R-ME) and Senator Luján (D-NM) for introducing S. 3427, “the Neuroscience Center of Excellence Act of 2021”. The bill would require the establishment of a Neuroscience Center of Excellence at the Food and Drug Administration to tackle the significant unmet need faced by those living with psychiatric and neurologic diseases. The Working Table looks forward to working with Senators Collins and Luján to advance S. 3427 through the legislative process.”
